

## Overview of Systems Change Efforts and Evaluation Components

## Evaluation of Organizational Capacity Building

# Evaluation of Collaboration

## Sample Program Descriptions

### **Organizational Capacity Building**

The organizational capacity building efforts aim to support organizations in forming sound policies, organizational structures, and effective methods of management and budgeting to serve those in need of mental health PEI services.

### **Specific Services**

- Training and technical assistance
- Grants/funding to support agencies' capacity building

### **Collaboration and Networking**

The collaboration and networking efforts strive to enhance and maintain partnerships among the Division of Mental Health with mental health providers and system partners, including Alcohol and Drug Services, Child Welfare, Juvenile Justice, local school districts, primary care providers, senior and older adult services, cultural and ethnic service providers, and many other community organizations. Partners work to foster and maintain existing partnerships, as well as build new partnerships, and to continue to build capacity to understand, engage, and effectively serve the identified communities of need. They also, as able, contribute internal resources that may include space, equipment, staff, volunteers, peer support, and supervision.

### **Specific Services**

- Task force to engage partners in work on collective mission
- Network of providers to serve comprehensive needs of community
- Joint trainings and conferences
