

## Interoperability and eMPI Software RFP

## **Questions & Answers Related to Addendum 3**

Question	Component Pricing: Does CalMHSA have any better guidelines on the following areas in
<b>Q</b>	order to provide a more precise pricing:
	o Number of Counties
	o Number of Members in each of the Counties
	o Volumes of Transactions for IHE and Patient Matching
CalMHSA Answer	The requested numbers and volumes will be variable. Should volume, number of counties, and/or member count be a criterion for architecting and quoting your solution,
Allowel	please provide a range. For example:
	- Under 1 million transactions/month = XXX
	- 1 million to 2 million = XXX
	- 2 million to 3 million = XXX
	NOTE: Provided range is for example purposes only. Please provide a range applicable to your respective solution.
Question	Contracting: Is CalMHSA considering issuing this contract to a single vendor to cover all
	elements or are you going to issue a contract for ALL of the components to a single
	vendor or only contracting for a subset of those components?
CalMHSA	CalMHSA is evaluating both the option of purchasing individual components of an
Answer	interoperability and eMPI solution, and the option of purchasing the full solution
	previously proposed by Respondents. No decision has been made to award a single contract or multiple based on component at this time.
Question	Data Format: Can the counties provide the required data sets for the HL7
•	Implementation guides in flat CSV or JSON File formats?
CalMHSA	We are looking for technical vendors to provide requirements for processing and
Answer	ingesting of various data formats. The desired interoperability solution should be able to handle all data types and normalize data sets for downstream processing. If a Respondent's proposed solution has any limitations or specific requirements for exchange/processing, please specify in the proposal.
Question	<b>Implementation:</b> Do you anticipate ONE contract to cover all the counties or a separate contract for each county?
CalMHSA	Should a contract be awarded, the awardee will contract with CalMHSA, not the
Answer	individual counties. Currently, CalMHSA does not anticipate a separate contract for
	each county.
Question	Component Pricing: Given the knowledge (Respondent) has of the architecture and
	components within the solution, would CalMHSA consider the proposed itemized
	pricing? Implementation Hosting License Fee On-Going Support This would be for
	separated out for eMPI, Patient and Provider Directory APIs and IHE.

	T
CalMHSA	Please reference the "Interoperability eMPI Software RFP Addendum 3" for additional
Answer	information regarding the requested itemization.
Question	<b>Timeline for Meeting CMS Mandate:</b> What is the timeline by which CalMHSA is looking to start the program and the target date for meeting compliance to the CMS Interoperability 9115-F Mandate?
CalMHSA	Should a contract be awarded, and upon completion of contract execution, we anticipate
Answer	starting as soon as possible. Our goal is implementing the solution by late Q4 2023/early Q1 2024.
Question	<b>Conflict of interest doc:</b> Just pulled down the Conflict of Interest doc. Once signed how/where do we submit?
CalMHSA Answer	Please submit any/all documents in response to this Addendum 3 to CalMHSA's e-Procurement Portal at: https://www.bidnetdirect.com.
Question	FHIR DATA SOURCES:
	How many FHIR resources can we expect data to be coming from? What type of extract is expected?
CalMHSA	Variable. Generally, CalMHSA's desired FHIR compliance will align with HL7 published
Answer	guidelines both towards FHIR version Rx as well as implementation guides for CMS interoperability.
Question	General Question: The components that make up our interoperability and eMPI solutions are offered as a bundled, fully integrated, SaaS solution. Stripping out components will change how we implement, require additional scope to integrate with 3rd party offerings, and will impact the resourcing required to maintain these separate solutions. Are you looking to mix and match components from different bidders?
CalMHSA Answer	CalMHSA is evaluating both the option of purchasing individual components of an interoperability and eMPI solution, and the option of purchasing the full solution previously proposed by Respondents. No decision has been made to award a single contract or multiple based on component at this time.
Question	<b>General Question:</b> Under Itemization of Components of interoperability and eMPI solution itemization of pricing, please define hosting.
CalMHSA	If a Respondent's application requires hosting for the proposed solution, CalMHSA asks
Answer	that Respondent please provide the itemized cost for the hosting.
	If hosting costs are variable, please provide a range. For example:
	- Up to 500 GB of storage/"x" amount of resources = XXX
	- 501 GB to 1 TB/"x" amount of resources = XXX
	- Over 1 TB of storage/"x" amount of resources = XXX
	NOTE: Provided range is for example purposes only. Please provide a range applicable to your respective solution.
Question	Current request availability: Was the current request for additional information made
	available to all RFP respondents, or a shorter list?
CalMHSA	Addendum 3 was made available to all RFP respondents.
Answer	

agencies proposed to use solutions requested in the RFP?  CalMHSA Answer This number is variable. Should volume/member count be a criterion for architecting an quoting your solution, please provide a range. For example:  - Under 1 million transactions/month = XXX - 1 million to 2 million = XXX  NOTE: Provided range is for example purposes only. Please provide a range applicabl to your respective solution.  Question  Itemized component pricing: Regarding the request for specific itemized component pricing, is CalMHSA looking for the cost saving value for each should they be excluded, or is CalMHSA looking for the cost of each of these components as standalone pieces or software or service?  CalMHSA Answer  Question  IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA Answer  CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution?  CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing; is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA is requesting the cost of the standalone solution.		
Answer  Ans	Question	Number of clients served: How many clients are served at each of the 58 county
Answer quoting your solution, please provide a range. For example:  - Under 1 million transactions/month = XXX  - 1 million to 2 million = XXX  - 2 million to 3 million = XXX  NOTE: Provided range is for example purposes only. Please provide a range applicable to your respective solution.  Question Itemized component pricing: Regarding the request for specific itemized component pricing, is CalMHSA looking for the cost saving value for each should they be excluded, or is CalMHSA looking for the cost of each of these components as standalone pieces or software or service?  CalMHSA Answer  Question IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA CalMHSA is requesting the cost of the standalone solution.  Answer As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA (CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA (CalMHSA) is requesting the cost of the standalone solution.		· · · · · · · · · · · · · · · · · · ·
- Under 1 million transactions/month = XXX - 1 million to 2 million = XXX - 2 million to 3 million = XXX  NOTE: Provided range is for example purposes only. Please provide a range applicable to your respective solution.  Question  Itemized component pricing: Regarding the request for specific itemized component pricing, is CalMHSA looking for the cost saving value for each should they be excluded, or is CalMHSA looking for the cost of each of these components as standalone pieces or software or service?  CalMHSA Answer  Question  IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA Answer  Answer  CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA Answer  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.	CalMHSA	·
- 1 million to 2 million = XXX - 2 million to 3 million = XXX NOTE: Provided range is for example purposes only. Please provide a range applicable to your respective solution.  Question  Itemized component pricing: Regarding the request for specific itemized component pricing, is CalMHSA looking for the cost saving value for each should they be excluded, or is CalMHSA looking for the cost of each of these components as standalone pieces or software or service?  CalMHSA Answer  Question  IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA Answer  CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.	Answer	quoting your solution, please provide a range. For example:
- 2 million to 3 million = XXX NOTE: Provided range is for example purposes only. Please provide a range applicable to your respective solution.  Question  Itemized component pricing: Regarding the request for specific itemized component pricing, is CalMHSA looking for the cost saving value for each should they be excluded, or is CalMHSA looking for the cost of each of these components as standalone pieces or software or service?  CalMHSA Answer  Question  IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA Answer  CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA Answer  Question  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.		- Under 1 million transactions/month = XXX
NOTE: Provided range is for example purposes only. Please provide a range applicable to your respective solution.  Question  Itemized component pricing: Regarding the request for specific itemized component pricing, is CalMHSA looking for the cost saving value for each should they be excluded, or is CalMHSA looking for the cost of each of these components as standalone pieces or software or service?  CalMHSA Answer  Question  IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA Answer  Answer  CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.		- 1 million to 2 million = XXX
to your respective solution.  Question  Itemized component pricing: Regarding the request for specific itemized component pricing, is CalMHSA looking for the cost saving value for each should they be excluded, or is CalMHSA looking for the cost of each of these components as standalone pieces or software or service?  CalMHSA  CalMHSA is requesting the cost of each component as standalone software or service.  Answer  Question  IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA  Answer  Answer  CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA  CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?		- 2 million to 3 million = XXX
Remized component pricing: Regarding the request for specific itemized component pricing, is CalMHSA looking for the cost saving value for each should they be excluded, or is CalMHSA looking for the cost of each of these components as standalone pieces or software or service?    CalMHSA		NOTE: Provided range is for example purposes only. Please provide a range applicable
pricing, is CalMHSA looking for the cost saving value for each should they be excluded, or is CalMHSA looking for the cost of each of these components as standalone pieces or software or service?  CalMHSA Answer  CalMHSA is requesting the cost of each component as standalone software or service.  Puestion  IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA Answer  CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.		to your respective solution.
or is CalMHSA looking for the cost of each of these components as standalone pieces or software or service?  CalMHSA Answer  Question  IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.	Question	Itemized component pricing: Regarding the request for specific itemized component
CalMHSA Answer    CalMHSA   CalMHSA is requesting the cost of each component as standalone software or service.    Question   IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?    CalMHSA   CalMHSA is requesting the cost of the standalone solution.   As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.   Question   EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?   CalMHSA   CalMHSA is requesting the cost of the standalone solution.   CalMHSA   CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?   CalMHSA   CalMHSA is requesting the cost of the standalone solution.		pricing, is CalMHSA looking for the cost saving value for each should they be excluded,
CalMHSA is requesting the cost of each component as standalone software or service.  Answer  Question  IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA  Answer  CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA  CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA  CalMHSA is requesting the cost of the standalone solution.		or is CalMHSA looking for the cost of each of these components as standalone pieces of
Answer  Question  IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA  CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA  CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA  CalMHSA is requesting the cost of the standalone solution.		software or service?
IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?    CalMHSA   CalMHSA is requesting the cost of the standalone solution.	CalMHSA	CalMHSA is requesting the cost of each component as standalone software or service.
pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA  CalMHSA is requesting the cost of the standalone solution.  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA  Answer  Question  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA  CalMHSA is requesting the cost of the standalone solution.	Answer	
as an excludable feature of the total solution? If as a standalone solution, what is the scope of the functionality and implementation for this component?  CalMHSA CalMHSA is requesting the cost of the standalone solution.  Answer Answer As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA Answer Question FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.	Question	IHE Server/Functionality pricing: Regarding the requested IHE Server/Functionality
scope of the functionality and implementation for this component?  CalMHSA CalMHSA is requesting the cost of the standalone solution.  Answer Answer As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA Answer  Question FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.		pricing, is CalMHSA asking for the price of this functionality as a standalone solution or
CalMHSA CalMHSA is requesting the cost of the standalone solution.  Answer As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.		·
Answer  As a standalone the IHE server/functionality should be able to accommodate all IH profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA CalMHSA is requesting the cost of the standalone solution.		scope of the functionality and implementation for this component?
profiles and protocols including but not limited to XDS.b, XCPD/XCA, XDR, XCDR, etc.  Question  EMPI pricing: Regarding the requested eMPI pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an exclude-able feature of the total solution?  CalMHSA  Answer  Question  FHIR Server/Functionality pricing: Regarding the requested FHIR Server/Functionality pricing, is CalMHSA asking for the price of this functionality as a standalone solution or as an excludable feature of the total solution?  CalMHSA  CalMHSA is requesting the cost of the standalone solution.	CalMHSA	CalMHSA is requesting the cost of the standalone solution.
